---

---

**OPEN/ CLOSE.** The system open / close time is 12.30 midnight. Decide what your OPEN / CLOSE time is and only trade at that time.

**ACTION COLUMN** Start a trade when only when the system ACTION is Start BUY or Start SELL. It also indicates when the system has ENDED a trade.

Start the trade as close to the open price on the Start Date as possible. Just take it don't wait to see what happens.

As the system only reacts to 'Close / Open' prices place a long stop at some 300 points away. The system is only interested in 'open/close' figures not intraday.

**STATUS COLUMN** This column indicates the date of the trade start, if it 'is open', or whether the system has 'ENDED' the trade.

**OPTION COLUMN** The system indicates that it has concluded the trade by showing <END BUY> or <END SELL> This action is taken at OPEN/CLOSE time. The other indicator here will denote a suggested '<END UNDER>' figure. This figure is calculated at 25% under the best profit obtained at that point. Act on this figure at 'open / close' time.

**P/L COLUMN** The figure here is the amount of points of 'profit or loss' the trade has accumulated.

**75% COLUMN** The END sign in the 'option' column is generated when the profit falls to or under 75% of the best profit indicated in brown.

**TREND INDICATOR** Blue is positive BUY, Yellow is even balance, Green is positive SELL. 3 Blues are most positive buy sign and 3 Greens are most positive Sell sign.

The above logic is used to produce proof of profit. The system does not impose a stop loss when producing its figures and the system does not get back into a concluded trade.
